

of Mrs. McKelvey's *Yuccas* of the United States, an extensive treatment which will complement the first part, published in 1938. The second part of this very important study will be published in the same format as the first part and will similarly be elaborately illustrated by the author's striking photographs.

A number of technical and popular papers prepared by staff-members were published elsewhere. A bibliography of the papers published by staff-members and students follows.
